Term- I

Sr.No	Class	Paper	Name of Teacher
1	F.Y.B.Sc	Descriptive Statistics I	Thorat S.R.
2	F.Y.B.Sc	Discrete Probability	Thorat S.R.
3	S.Y.B.Sc	Discrete Probability Distributions and Time series	Thorat S.R.
4	S.Y.B.Sc	Continuous Probability Distributions	Thorat S.R.

Paper : Descriptive Statistics I.   Class: F.Y.B.Sc

Month	Topic	Subtopic
Aug 2022	**1. Introduction to Statistics**	1.1 Meaning of Statistics as a Science. 1.2 Importance of Statistics. 1.3 Scope of Statistics: 1.4 Statistical organizations in India and their functions:
	2. Population and Sample	2.1 Types of characteristics: 2.2 Types of data: 2.3 Notion of a statistical population 2.4 Methods of sampling
	3.Presentation	3.1 Classification 3.2 Frequency Distribution

	of data	3.3 Methods of classification 3.4 Cumulative frequencies 3.5 Relative frequency 3.6 Guidelines for choice of classes 3.7 Graphical representation of statistical data 3.8 Stem and leaf chart 3.9 Data Analysis and interpretation
Aug 2022	**4. Measures of central tendency**	4.1 Introduction 4.2 Objectives of Measures of Central Tendency 4.3 Arithmetic Mean (A.M.) 4.4 Trimmed mean 4.5 Median
Sept 2022		4.7 Geometric mean 4.8 Mode Harmonic mean 4.9 Weighted means 4.9 Partition values 4.10 Box and whisker plot
	5. Measures of Dispersion	5.1 Introduction 5.2 Measures of Dispersion 5.3 Range and Coefficient of range 5.4 Quartile deviation
Oct 2022		5.5 Mean deviation and coefficient of mean deviation 5.6 Mean square deviation 5.7 Variance , standard deviation , coefficient of variation
Nov 2022	**6. Moments**	6.1 Raw moments (m'_r) for ungrouped and grouped data 6.2 Central moments (m_r) for ungrouped and grouped data 6.3 Relations between central moments and raw moments, upto 4-th order 7.1 Concept of skewness of frequency distribution,

Nov 2022	**7. Skewness and Kurtosis**	positive skewness, negative skewness, symmetric frequency distribution. 7.2 Bowley's coefficient of skewness 7.3 Karl Pearson's coefficient of skewness. 7.4 Measures of skewness based on moments $(\beta 1, \gamma 1)$. 7.4 Concepts of kurtosis, leptokurtic, mesokurtic and platykurtic frequency distributions. 7.5 Measures of kurtosis based on moments $(\beta 2, \gamma 2)$.
Nov , Dec 2022	**8. Theory of Attributes**	8.1 Attributes: 8.2 Consistency of data upto 2 attributes. 8.3 Concepts of independence and association of two attributes. 8.4 Yule's coefficient of association (Q), $-1 \leq Q \leq 1$, interpretation.

Paper : Discrete Probability and probability Distributions I
Class: F.Y.B.Sc

Month	Topic	Subtopic
Sept/Oct 2022	**1. Basics of Probability**	1.1 Experiments/Models, Ideas of deterministic and non-deterministic models. Random Experiment, concept of statistical regularity. 1.2 Definitions of - (i) Sample space, (ii) Discrete sample space: finite and countably infinite, (iii) Event, (iv) Elementary event, (v) Complement of an event. (vi) Certain event (vii) Impossible event Concept of occurrence of an event. Algebra of events and its representation in set theory notation. Occurrence of following events. (i) at least one of the given events, (ii) none of the given events, (iii) all of the given events, (iv) mutually exclusive events, (v) mutually exhaustive events, (vi) exactly one event out of the given events. 1.3 Classical definition of probability and its limitations. Probability model, probability of an event, equiprobable and non-equiprobable sample space, 1.4 Axiomatic definition of probability. Theorems And results on probability with proofs based on axoomatic approach. Such as, $P(A \cup B) = P(A) + P(B) - P(A \cap B)$ Generalisation $P(A \cup B \cup C), 0 \leq P(A) \leq 1, P(A) + P(A') = 1, P(\phi) = 0, \ P(A) \leq P(B)$ if A is subset of B, Boole's inequality 2.1 Definition of conditional probability of an event. Definition of independence of two events

	2.Conditional Probability and Baye's theorem	$P(A \cap B) = P(A) \cdot P(B)$ Pairwise independence and mutual independence for three events Multiplication theorem $P(A \cap B) = P(A) \cdot P(B\|A)$. Generalization to $P(A \cap B \cap C)$. 2.2 Partition of the sample space Proof of Bayes' theorem. Applications of Bayes' theorem in real life True Positive, False positive and sensitivity of test as application of Baye's theorem.
Nov 2022	**3. Univariate Probability Distributions (Defined on Discrete Sample Space)**	3.1 Concept and definition of a discrete random variable. 3.2 Probability mass function (p.m.f.) and cumulative distribution function (c.d.f.), $F(\cdot)$ of discrete random variable, properties of c.d.f.. 3.3 Mode and median of a univariate discrete probability distribution
Nov , Dec 2022	**4. Mathematical Expectation (Univariate Random Variable)**	4.1 Definition of expectation (Mean) of a random variable, expectation of a function of a random variable, , m.g.f. and c.g.f. Properties of m.g.f and c.g.f. 4.2 Definitions of variance, standard deviation (s.d.) and Coefficient of variation (c.v.) of univariate probability distribution, effect of change of origin and scale on mean, variance and s.d. 4.3 Definition of raw, central and factorial raw moments of univariate probability Distributions and their interrelations (without proof). 4.4 Coefficients of skewness and kurtosis based on moments.

Dec 2022	5. Some Standard Discrete Probability Distributions - I	5.1 Degenerate distribution, mean and variance 5.2 Uniform discrete distribution, p.m.f., c.d.f., mean, variance, real life situations, comments on mode and median 5.3 Bernoulli Distribution: p.m.f., mean, variance 5.4 Binomial Distribution: p.m.f., mean, variance 5.5 Hypergeometric Distribution : p.m.f., Computation of probability, situations where this distribution is applicable, binomial approximation to hypergeometric probabilities, mean and variance of the distribution

Paper : Discrete Probability Distributions and Time series
Class: S.Y.B.Sc (Sem-III)

Month	Topic	Subtopic
Sept /Oct 2022	**1. Statndard Discrete Distributions**	**1.1 Negative Binomial Distribution:** Probability mass function (p. m. f.) Notation: $X \sim NB(k, p)$. Nature of p. m. f., negative binomial distribution as a waiting time distribution, M.G.F., C.G.F., mean, variance, skewness, kurtosis (recurrence relation between moments is not expected). Relation between geometric and negative binomial distribution. Poisson approximation to negative binomial distribution. Real life
Oct/Nov 2022		**1.2 Multinomial Distribution:** Probability Mass function, Notation use of MGF to obtain means, variances, covariances, total correlation coefficients, multiple and partial correlation coefficients for k= 3, univariate marginal distribution, distribution of $X_i + X_j$, conditional distribution of X_i given $X_i + X_j = r$, variance – covariance matrix, rank of variance – covariance matrix and its interpretation and real life situations and

		applications.
Nov 2022		**1.3 Truncated Distributions:** Concept of Truncated distribution, truncation to the right, left and on both sides. Binomial distribution B(n, p) left truncated at X=0 (value zero is discarded), its p.m.f., mean, variance . Poisson distribution P(m) left truncated at X=0 (value zero is discarded), its p.m.f. , mean, variance. Real life situations and applications.
Jan 2023	**2.Time Series:**	2.1 Meaning and utility of time series, Components of time series: trend, seasonal variations, cyclical variations, irregular (error) fluctuations or noise. 2.2 Exploratory data analysis: Time series plot to (i) check any trend, seasonality in the time series (ii) learn how to capture trend. 2.3 Methods of trend estimation and smoothing: (i) moving average, (ii) curve fitting by least square principle, (iii) exponential smoothing. 2.4 Measurement of seasonal variations : i) simple average method, ii) ratio to moving average method, iii) ratio to trend where trend is calculated by method of least squares. 2.5 Choosing parameters for smoothing and forecasting. 2.6 Forecasting based on exponential smoothing. 2.7 Double exponential smoothing i.e. Holt-Winters method 2.8 Fitting of autoregressive model AR (1), plotting of residuals. 2.9 Data Analysis of Real Life Time Series:

Paper : Continuous Probability Distributions   Class: S.Y.B.Sc (Sem-III)

Month	Topic	Subtopic
Oct 2022	1.Continuous Univariate Distributions:	1.1 Continuous sample space: Definition, illustrations. Continuous random variable: Definition, probability density function (p.d.f.), cumulative distribution function (c.d.f.), properties of c.d.f. (without proof), probabilities of events related to random variable. 1.2 Expectation of continuous r.v., expectation of function of r.v. E[g(X)], mean, variance, geometric mean, harmonic mean, raw and central moments, skewness, kurtosis. 1.3 Moment generating function(M.G.F.):Definition and properties,cumulant generating function (C. G. F.) : definition, properties. 1.4 Mode, median, quartiles. 1.5 Probability distribution of function of r. v.: Y = g(X) using i) Jacobian of transformation for g(.) monotonic function and one-to-one, on to functions, ii) Distribution function for $Y = X^2$, Y = |X| etc., iii) M.G.F. of g(X).
Oct / Nov 2022	2.Continuous Bivariate Distributions:	2.1 Continuous bivariate random vector or variable b(X, Y): Joint p. d. f. , joint c. d. f , properties (without proof), probabilities of events related to r.v. (events in terms of regions bounded by regular curves, circles, straight lines). Marginal and conditional distributions. 2.2 Expectation of r.v., expectation of function of r.v. E[g(X, Y)], joint moments, Cov (X,Y), Corr (X, Y), conditional mean, conditional variance, E[E(X|Y = y)] = E(X), regression as a conditional expectation. 2.3 Independence of r. v. (X, Y) and its extension to k dimensional r. v. Theorems on expectation: i) E(X + Y) = E(X) + E(Y), (ii) E(XY) = E(X) E(Y), if X and Y are independent, generalization to k variables. E(aX + bY + c), Var (aX + bY + c).

		2.4 M.G.F. : $M_{X,Y}(t_1, t_2)$, properties, M.G.F. of marginal distribution of r. v.s., properties $M_{X,Y}(t_1, t_2) = M_X(t_1, 0) M_Y(0, t_2)$, if X and Y are independent r. v.s., $M_{X+Y}(t) = M_{X,Y}(t, t)$, $M_{X+Y}(t) = M_X(t) M_Y(t)$ if X and Y are independent r.v.s. 2.5 Probability distribution of transformation of bivariate $U = f_1(X, Y)$, $V = f_2(X, Y)$.
Nov 2022	**3.Standard Univariate Continuous Distributions:**	**3.1 Uniform or Rectangular Distribution:** Probability density function (p.d.f.) Notation : X ~ U[a, b] . p. d. f., sketch of p. d. f., c. d. f., mean, variance, symmetry. Distribution of i) $X - a$, ii) $b - X$, iii) Y = F(X), where F(X) is the c. d. f. of continuous r. v. X. Application of the result to model sampling. (Distributions of X + Y, X − Y, XY and X/Y are not expected.)
Dec. 2022		**3.2 Normal Distribution:** p. d. f. curve, identification of scale and location parameters, nature of probability curve, mean, variance, M.G.F., C.G.F., central moments, cumulants, b_1, b_2, g_1, g_2, median, mode, quartiles, mean deviation, additive property, computations of normal probabilities using normal probability integral tables, probability distribution of : i) $X - m$, ii) aX + b, iii) aX + bY + c, iv) X^2, where X and Y are independent normal variates. Probability distribution of X, the mean of n i. i. d. $N(m, s^2)$ r. v s. Normal probability plot, q-q plot to test normality. Model sampling from Normal distribution using (i) Distribution function method and (ii) Box-Muller transformation as an application of simulation.

		Statement and proof of central limit theorem (CLT) for i. i. d. r. v. s with finite positive variance.(Proof should be using M.G.F.) Its illustration for Poisson and Binomial distributions.
Jan 2023		**3.3 Exponential Distribution:** Probability density function (p. d. f.) Nature of p. d. f., density curve, interpretation of *a* as rate and $1/a$ as mean, mean, variance, M. G. F., C. G. F., c. d. f., graph of c. d. f., lack of memory property, median, quartiles. Distribution of min(X, Y) with X, Y i. i. d. exponential r. v. s.

Syllabus Completion Report
Academic Year 2022-23
Term II

Sr.No	Class	Paper	Name of Teacher
1	F.Y.B.Sc	Descriptive Statistics II	Thorat S.R.
2	F.Y.B.Sc	Discrete Probability Distributions	Thorat S.R.
3	S.Y.B.Sc	Test of Significance and Statistical Methods	Thorat S.R.
4	S.Y.B.Sc	Sampling Distributions and Exact Test	Thorat S.R.

Paper : Descriptive Statistics II.   **Class: F.Y.B.Sc**

Month	Topic	Subtopic
April 2023	1. Correlation	1.1 Bivariate data, Scatter diagram and interpretation. 1.2 Concept of correlation between two variables 1.3 Covariance between two variables (m11) : 1.4 Karl Pearson's coefficient of correlation (r) 1.5 Spearman's rank correlation coefficient: compute Karl Pearson's correlation coefficient between ranks.
May 2023	2. Fitting of Curve (Regression Line)	2.1 Concept of dependent and independent variables. 2.2 Identification of response and predictor variables and relation between them. 2.3 Simple linear regression model: $Y = a + b X + \varepsilon$ 2.4 Concept of residual, plot of residual, coefficient of determination

May 2023	**3. Curve fitting**	3.1 Necessity and importance of drawing second degree curve. 3.2 Fitting of second degree curve 3.3 Fitting of exponential Curve of the type $Y=ab^x$ and $Y=aX^b$
May 2023	**4. Index Number**	4.1 Introduction. 4.2 Definition and Meaning. 4.3 Problems/considerations in the construction of index numbers. 4.4 Simple and weighted price index 4.5 Simple and weighted price index 4.6 Laspeyre's, Paasche's and Fisher's Index numbers. 4.7 Consumer price index number (i) family budget method (ii) aggregate expenditure method. 4.3 Shifting of base, splicing, deflating, purchasing power. 4.4 Description of the BSE sensitivity and similar index numbers.

Paper : Discrete probability Distributions   Class:F.Y.B.Sc

Month	Topic	Subtopic
April/ May 2023	**1. Some Standard Discrete Probability Distributions**	**1.1 Poisson distribution:** m.g.f. and c.g.f. Moments, mean, variance, skewness and kurtosis, Additive Property for Poisson distribution Conditional distribution of X given (X+Y) for Poisson distribution. **1.2 Geometric distribution:** Mean, variance, m.g.f. and c.g.f. Lack of memory Property.
May 2023	**2. Bivariate Discrete Probability Distribution**	2.1 Definition of two-dimensional discrete random variable, its joint p.m.f. and its distribution function and their properties 2.2 Concept of identically distributed random variables. 2.3 Computation of probabilities of events in bivariate probability distribution. 2.4 Concepts of marginal and conditional probability distributions. 2.5 Independence of two discrete random variables based on joint and marginal p.m.f.s
May 2023	**3.Mathematical Expectation (Bivariate Random Variable)**	3.1 Definition of raw and central moments, m.g.f, c.g.f. 3.2 Theorems on expectations .3.3 Conditional expectation. 3.4 Definitions of conditional mean and conditional variance. 3.5 Definition of covariance, coefficient of correlation, independence and uncorrelatedness of two variables. 3.6 Variance of linear combination of variables Var(aX + bY).Correlation coefficient

Paper : Test of Significance and Statistical Methods
Class: S.Y.B.Sc (Sem-IV)

Month	Topic	Subtopic
March 2023	**I) Tests of Hypothesis**	Statistics and parameters, statistical inference : problem of estimation and testing of hypothesis. Estimator and estimate. Unbiased estimator (definition and illustrations only). Statistical hypothesis, null and alternative hypothesis, Simple and composite hypothesis, one sided and two sided alternative hypothesis, critical region, type I error, type II error, power of the test, level of significance, p-value. Two sided confidence interval, finding probabilities of type I error and type II error when critical regions are specified . i) Test for population mean equal to specified value ii) Test of equality of two population mean iii) Test for population proportion equal to specified value. iv) Test for equality of two population proportions.
March/April 2023	**II) Multiple Linear Regression Model:**	Definition of multiple correlation coefficient $R_{Y.XX}$. Derivation of the expression for the multiple correlation coefficient. Properties of multiple correlation coefficient Interpretation of coefficient of multiple determination Definition of partial correlation coefficient Fitting of regression plane of Y on X_1 and X_2, by the method of least squares; obtaining normal equations, solutions of normal equations Residuals : Definition, order, derivation of variance, properties. Definition and interpretation of partial regression coefficient**s** Properties of partial correlation coefficient:
May 2023	**III) Dempgraphy**	Vital events, vital statistics, methods of obtaining vital statistics, rates of vital events, sex ratios, dependency ratio. Death/Mortality rates: Crude death rate, specific (age,

		sex etc.) death rate, standardized death rate (direct and indirect), infant mortality rate. Fertility/Birth rate: Crude birth rate, general fertility rate, specific (age, sex etc.) fertility rates, total fertility rate. Growth/Reproduction rates : Gross reproduction rate, net reproduction rate. Interpretations of different rates, uses and applications. Trends in vital rates as revealed in the latest census.
April 2023	**IV)** **Queuing Model**	M/M/1: FIFO as an application of exponential distribution, Poisson distribution and geometric distribution : Inter arrival rate , service rate (μ), traffic intensity ,queue discipline probability distribution of number of customers in queue, average queue length, average waiting time in: i) queue, ii) system.

Paper : Sampling Distributions and Exact Test   Class: S.Y.B.Sc (Sem-IV)

Month	Topic	Subtopic
April 2023	**1. Gamma Distribution**	P.D.F , Nature of Probability curve , M.G.G,C.G.F, moments,Cumulants,Skewness,Kurtosis,Mode, Additive Property, Distribution of sum of i.i.d exponential variables.
April / May 2023	**2.Chi-square Distribution**	Definition of Chi-squarer. v. as sum of squares of i. i. d. standard ^{n}normal variables Derivation of p. d. f. of with n degrees of freedom (d. f.) using M. G. F., nature of p. d. f. curve, computations of probabilities using tables of distribution. mean, variance, M. G. F., C. G. F., central moments, mode, additive property.
	3.Student's t-distribution	χ_n Definition of T r. v. with n d. f. Derivation of p. d. f., nature of probability curve, mean, variance, moments, mode, use of tables of t-distribution for calculation of probabilities, statement of normal approximation.
May 2023	**4.Snedecore's F-distribution:**	Definition of F r. v. with n_1 and n_2 d. f. Derivation of p. d. f., nature of probability curve, mean, variance, moments, mode. Distribution of 1/F use of tables of F-distribution for calculation of probabilities. Interrelations between Chi-Square , T and F distribution. Tests based on chi-square distribution: Test for independence of two attributes arranged in 2 X2 contingency table. (With Yates' correction).

	5.Test of Hypothesis:	Test for independence of two attributes arranged in r X s contingency table, McNemar's test
		Test for 'Goodness of Fit'. (Without rounding-off the expected frequencies).
		d) Test for population variance equal to specified value$_0$. when i) mean is known , ii) mean is unknown. Tests based on t-distribution:
		t-tests for population means : i) one sample and two sample tests for one sided and two sided alternatives. Confidence interval. Paired t-test for one-sided and two-sided alternatives.
		Test based on F-distribution: Test for equality of two population variance. when i) means are known, ii) means are unknown.
