**Department of Geography**

**Group Discussion of Climate**

Many types of programs are organized in the Department of Geography of Hutatma Rajguru Mahavidyalaya. On 12/03/24 a group discussion was organized on Climate Change for the class of TYBA. 15 students participated in this.

The inspiration behind the organization of this program is Given by the principal of the college Dr. Shirish Pingale. For the program, Guided by Dr. Dilip Muluk.

At the beginning of the program Dr. DM Markad introduced the programme. The students then discussed different aspects of climate change. According to some students, the main cause of climate change is the industrial revolution. After the Industrial Revolution, there was a huge increase in factories. Due to this, carbon dioxide gas increased in the air. Hence the greenhouse effect takes place. Carbon dioxide gas absorbs the heat of the sun. This increases the air temperature. The amount of carbon dioxide gas in the air is 0.03 percent. But recently due to industrialization, the concentration of carbon dioxide in the air has increased to 0.034 percent. Therefore, the average temperature of the earth is increasing due to the increase in heat in the air.

Some students discussed other factors that could be responsible for global warming. Population growth, deforestation, urbanization, contributes to global warming. Also, the increase in number of vehicles, burning of fossil fuels, fires, emission of polluting gases causes global warming.

Some students mentioned the effects of climate change. Due to climate change, there is heavy rain in some places and no rain in other places. There are many cloud bursts. The snow on the Himalayas is melting. So the sea level is rising. Some students suggested solutions to global warming.

Chairman of the program Dr. Dilip Muluk brief summarized the program. Prof. Prof. M.L. Muluk, gave a comprehensive overview of global warming and thanked. Dr. D.M. Markad organized and conducted the program.
