Speech Competition

Department of Geography of Hutatma Rajguru Mahavidyalaya, On 6/03/24 an elocution competition was organized on the topic of water conservation. 10 students of Geography Department participated in this activity.

Due to increasing climate change and population growth, water scarcity is becoming felt. There is an urgent need of water for important businesses such as industry, agriculture, animal husbandry. Water is also needed for drinking, washing and bathing. But recently there has been a huge shortage of water. Due to this, an elocution competition was organized on the topic of water saving.

In this speech competition, students presented their thoughts on the topic of water saving in many ways. We can save water in many ways in our daily life. Rivers flood during monsoons but dams dry up in summers and water scarcity is felt. Most of the agriculture is irrigated by irrigation system. In some places, water is left open in the fields. This leads to unnecessary wastage of water in the fields. It is different that excess water makes the land infertile.

Different irrigation methods should be adopted to save water in agriculture. Drip irrigation, sprinkler irrigation, micro irrigation, matka irrigation, etc. save 50 to 60 percent of water. We can also save water while using domestic water. Do not run the tap while shaving, shower in a single bucket. Do not use the shower. Students said that many measures can be taken such as not running the tap while brushing, running the washing machine on full load.

The numbers of the following students were drawn in this competition.
